Unless otherwise noted in the "COMMENTS" column, the following pertains to all entries made in this log:

Station Location Box J-12 JHMHC  
(Street Address)  
Gainesville  
(City/Town)  
Florida 32601  
(State/Province) (Country)

Time entries are in (check one):  Coordinated Universal Time (UTC)  
 \_\_\_\_\_ Time

Operator's Signature Jamie Dwyne KAZIKE "Da Prez"

**EMISSION TYPES**

- |  |  |
|--|--|
| A0 Steady, unmodulated, pure carrier.  | F1 Frequency-shift keying (fsk).           |
| A1 Telegraphy on pure continuous wave.   | F2 Audio-frequency-shift keying (afsk).    |
| A2 Amplitude tone-modulated telegraphy.  | F3 Frequency or phase-modulated telephony. |
| A3 Amplitude-modulated telephony. A3 includes single and double sideband with full, reduced or suppressed carrier. | F4 Facsimile (frequency-modulated).        |
| A4 Facsimile (amplitude-modulated).  | F5 Television (frequency-modulated).       |
| A5 Television (amplitude-modulated).   | P Pulse.                                   |

# ABOUT THIS LOG

## THE ARRL UNIVERSAL LOG

Besides maintaining the minimum requirements, most radio amateurs keep a detailed log of their on-the-air activities. Such facilitates confirmation of QSL requests, investigation of potential TVI/RFI complaints, and detection of unauthorized use of your call sign. Keeping a neat accurate log is a matter of personal pride with the active radio amateur.

The ARRL Universal Log suits every type of amateur operation, DXing, contests, ragchews, casual. The left-hand segment of the log sheet contains generally fixed information which is not subject to change between contacts. This includes DATE, FREQ., MODE, and POWER. Consult the inside cover for mode designation unless you prefer to enter CW, SSB, FM, etc. The power should be indicated in watts input.

The right-hand segment of the log sheet contains the variable items that will change from contact to contact. This includes TIME (UTC recommended and indicated on inside cover), call sign of the STATION WORKED, and RST REPORT SENT and RECEIVED. The TIME OFF column may also be used to log EXCHANGE information for state QSO Parties and contests for which separate log sheets are not used. This column is located adjacent to the REPORT RECEIVED to facilitate this use. Otherwise, the station operator may use this column to log TIME OFF for ragchews and casual contacts. The COMMENTS column may be used for QTH, NAME, and QSL information, or any other information that the operator wishes to note. The COMMENTS column should also be used to indicate any variation from the standard information required on the inside cover. A checkmark will indicate QSL sent and received.

Be sure to fill out the required information on the inside cover.

### LOG REQUIREMENTS

Although logging requirements have been relaxed in recent years, every Amateur Station in the U.S. must have a log with the following items as a minimum requirement:

- 1) The call sign of the station, the signature of the station licensee, or a photocopy of the station license.
- 2) The locations and dates upon which fixed operation of the station was initiated and terminated. If applicable, the location and dates upon which portable operation was initiated and terminated at each location.

3) The date and time periods the duty control operator for the station was other than the station licensee, and the signature and primary station call sign of that duty control operator.

4) A notation of third-party traffic sent or received, including names of all third parties, and a brief description of the traffic content. This entry may be in a form other than written, but one which can be readily transcribed by the licensee into written form.

5) Additional information as directed by the FCC.

6) Additional technical and other information when a station is remotely controlled, when a station has one or more associated stations, or when a station is operated in repeater operations. (See §97.103 of the Amateur Rules.)

### RETENTION OF LOGS

The station log must be kept for a period of at least one year from the date of the last entry and be made available to the FCC for inspection if required.

### PORTABLE AND MOBILE OPERATIONS

Amateurs do not need to notify the FCC of mobile or portable operations. However, as seen in number 2 (above), the licensee must make a notation in the station log setting forth the locations and dates upon which fixed operation of the station is initiated and terminated. In addition, the licensee must make a notation for each time portable operation is initiated and terminated.

FCC defines portable operation as radiocommunications conducted from a specific geographical location other than that shown on the station license. Mobile operation is radiocommunication conducted while in motion or during halts at unspecified locations.

### AVAILABILITY OF LICENSE

You must have your original license (or a photocopy) with you when you are operating mobile, portable, or guest-operating at another station. At your own station location you may post your license (or a photocopy) near the operating position in lieu of having it on your person. A convenient place is provided on the inside cover of this logbook for attaching a photocopy of your license. If you are guest-operating, you must have available for inspection the station license (or a photocopy) for that station, in addition to your own operator's license.

See inside front cover.

Input in Watts.

UTC recommended.

RST. See back inside cover.

This column may also be used for contest exchange info. received.
